

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A laser pointer for use as an aid in the visual presentation of information comprising a plurality of laser elements capable of emitting beams of visible light, at least two of said laser elements emitting light at different frequencies, additionally comprising a battery and a electrical switching circuit, wherein said device weighs no more than 450 grams.
2. (Previously Presented) A laser pointer for use as an aid in the visual presentation of information comprising a plurality of laser elements capable of emitting beams of visible light, at least two of said laser elements emitting light at different frequencies, wherein at least one of said laser elements is a laser diode.
3. (Previously Presented) A laser pointer for use as an aid in the visual presentation of information comprising a plurality of laser diodes capable of emitting beams of visible light, at least two of said laser diodes emitting light at different frequencies.
4. (Previously Presented) The pointer according to claim 1 wherein no more than one laser element may be actuated at any one time.
5. (Previously Presented) The pointer according to claim 2 wherein no more than one laser element may be actuated at any one time.
6. (Previously Presented) The pointer according to claim 3 wherein no more than one laser diode may be actuated at any one time.
7. (Previously Presented) The pointer according to claim 1 wherein said at least two laser elements emit beams which are collimated beams which are substantially parallel.

8. (Previously Presented) The pointer according to claim 2 wherein said at least two laser elements emit beams which are collimated beams which are substantially parallel.

9. (Previously Presented) The pointer according to claim 3 wherein said at least two laser diodes emit beams which are collimated beams which are substantially parallel.

10. (Previously Presented) The pointer according to claim 1 wherein at least one of said laser elements emits light at a red, orange or yellow visible wavelength and at least one of said laser elements emits light at a green, blue or violet visible wavelength.

11. (Previously Presented) The pointer according to claim 2 wherein at least one of said laser elements emits light at a red, orange or yellow visible wavelength and at least one of said laser elements emits light at a green, blue or violet visible wavelength.

12. (Previously Presented) The pointer according to claim 3 wherein at least one of said laser diodes emits light at a red, orange or yellow visible wavelength and at least one of said laser diodes emits light at a green, blue or violet visible wavelength.

13. (Previously Presented) The pointer according to claim 1 wherein at least one of said laser elements emits light at a red visible wavelength and at least one of said laser elements emits light at a green or blue visible wavelength.

14. (Previously Presented) The pointer according to claim 2 wherein at least one of said laser elements emits light at a red visible wavelength and at least one of said laser elements emits light at a green or blue visible wavelength.

15. (Previously Presented) The pointer according to claim 3 wherein at least one of said laser diodes emits light at a red visible wavelength and at least one of said laser diodes emits light at a green or blue visible wavelength.

16. (Previously Presented) The pointer according to claim 1 wherein at least one of said laser elements is a green-emitting II-VI semiconductor laser diode and at least one of said laser elements is a red-emitting III-V semiconductor laser diode.

17. (Previously Presented) The pointer according to claim 2 wherein at least one of said laser elements is a green-emitting II-VI semiconductor laser diode and at least one of said laser elements is a red-emitting III-V semiconductor laser diode.

18. (Previously Presented) The pointer according to claim 3 wherein at least one of said laser diodes is a green-emitting II-VI semiconductor laser diode and at least one of said laser diodes is a red-emitting III-V semiconductor laser diode.

19. (Previously Presented) The pointer according to claim 6 wherein at least one of said laser diodes is a green-emitting II-VI semiconductor laser diode and at least one of said laser diodes is a red-emitting III-V semiconductor laser diode.

20. (Previously Presented) The pointer according to claim 1 wherein at least one of said laser elements comprises a green-emitting frequency-doubled laser and at least one of said laser elements comprises a red-emitting III-V semiconductor laser diode.

21. (Previously Presented) The pointer according to claim 2 wherein at least one of said laser elements comprises a green-emitting frequency-doubled laser and at least one of said laser elements comprises a red-emitting III-V semiconductor laser diode.

22. (Previously Presented) The pointer according to claim 2 additionally comprising a battery and a electrical switching circuit, said device weighing no more than 450 grams.

23. (Previously Presented) The pointer according to claim 3 additionally comprising a battery and a electrical switching circuit, said device weighing no more than 450 grams.

B1
Corr

24. (Previously Presented) The pointer according to claim 20 additionally comprising a battery and a electrical switching circuit, said device weighing no more than 450 grams.
